

Tons of Recycled Material

In 2009 the City retained one-single waste hauler to represent the majority of residential homes. This included recycling as part of the basic service package for all residents to use, at very competitive pricing. To date, the program has been received by residents very positively, with recycling volumes increasing steady.

Indicator Score = Red/Worse

TREND ANALYSIS:

Providing residents with recycling as part of their basic service improved not only the quality of life for them, but for the region as a whole.
