Skyline® Honeylocust (*Gleditsia triacanthos*)

Origin: Cole Nursery (OH); species native to Michigan

Mature Size: Large (>45' tall)

Description: Skyline® Honeylocust has a moderate growth rate, and is tolerant to a wide range of environmental conditions. It has a pyramidal to oval shape as a young tree, becoming broader as it matures. It does not have any serious disease or pest problems, but plant bugs, leafhoppers and mites are sometimes noticeable on the foliage. It has compound leaves with very small leaflets, turning yellow in the fall. Skyline® is a seedless variety.
